PLASTIC REPAIR SYSTEM

Repair, maintenance and modification of plastic objects and components

ISO 9001

ISO 14001

About PRS

We are pioneers in the repair and maintenance of any object or component made of plastic. Our R&D department constantly searches for ways to improve our techniques in order to offer an efficient and effective service.

Our patented and certified PRS System guarantees to repair the product in mint condition and consequently extend the life of the repaired products.

The repair, maintenance or modification of any plastic object or component allows our clients to use their items for a longer time in excellent condition.

Our large network of workshops offers our services on a national (and international) level.

Our mission

To generate interest for the maintenance and repair of plastic objects and components

To contribute to economic, environmental and social sustainability

Our values

Reduce costs
↓
efficiency

Minimize
waste materials

Corporate social
responsibility
(CSR)

Reduce
carbon footprint

Support the inclusion
of disabled people in
the work place

Quality PRS

Our PRS welding system with plastic filler material is **certified** by the Instituto Tecnológico del Plástico (**AIMPLAS**) and the Centro Multidisciplinar de Tecnologías para la industria (**CEMITEC**).

Both institutions work independently and have verified that our repairs have a durability of 98 percent in comparison with the original material.
